

ENTERPRISE PROMPTS FOR BUSINESS LEADERS (16-20)

16. Change Management Communication Plan

We're rolling out [AI tool/system] to [target audience] who may be resistant. Create a 90-day change management communication plan including: announcement strategy, training schedule, champion identification, feedback loops, success stories to highlight, and messaging to address common fears. Make it empathetic but results-focused.

17. Technical Architecture Review

Review this AI system architecture: [describe components: LLM, vector DB, APIs, etc.]. Act as a senior solutions architect. Identify single points of failure, security vulnerabilities, scalability bottlenecks, cost optimization opportunities, and suggest specific improvements with pros/cons for each.

18. Stakeholder Alignment Generator

I need to align [list stakeholders: CFO, CTO, Legal, Operations] on [AI initiative]. For each stakeholder, identify their likely concerns, the metrics they care about most, the language/framing that resonates with them, and specific talking points I should prepare. Then create a unified message that addresses all concerns.

19. AI Incident Response Playbook

Create an incident response playbook for when our AI system [describe potential failures: hallucinates customer data, makes biased decisions, crashes under load, etc.]. Include: detection criteria, escalation paths, communication templates (internal and customer-facing), remediation steps, and post-mortem framework.

20. Prompt Engineering Best Practices Audit

Audit these prompts our team is using in production: [paste prompts]. Evaluate them for: clarity, specificity, guardrails against misuse, output consistency, cost efficiency, and hallucination risk. Suggest improved versions with explanations of what changed and why.

ENTERPRISE PROMPTS FOR BUSINESS LEADERS (11-15)

11. Strategic Business Case Generator

I need to build a business case for [AI initiative] at a [company size] company in [industry]. Act as a management consultant. Create a structured business case including: problem statement, proposed solution, expected ROI with conservative estimates, implementation timeline, resource requirements, risk analysis, and key success metrics. Format it for executive presentation.

12. Competitive Intelligence Analysis

Analyze how [competitor/industry leader] is using AI in their operations. Based on public information, job postings, product features, and press releases, reverse-engineer their AI strategy. Identify their likely vendors, use cases, competitive advantages gained, and gaps we could exploit.

13. AI Vendor Evaluation Framework

We're evaluating [type of AI solution] vendors for [specific use case]. Create a comprehensive RFP scoring rubric that includes: technical capabilities, security/compliance, integration complexity, total cost of ownership, vendor stability, support quality, and exit strategy. Weight each criterion appropriately for an enterprise buyer.

14. Process Automation Opportunity Finder

Act as a business process consultant. Analyze this workflow: [describe current process]. Identify automation opportunities using AI, estimate time/cost savings for each, assess implementation difficulty (easy/medium/hard), and prioritize based on ROI. Flag any risks or compliance considerations.

15. AI Governance Policy Generator

Create an AI governance policy for a [company size] [industry] company. Include: acceptable use guidelines, data handling requirements, human oversight protocols, risk assessment criteria, approval workflows, and compliance checkpoints. Make it specific enough to be actionable but flexible enough to adapt as AI evolves.

10 SMART MINI-PROMPTS FOR PERSONAL GROWTH (6-10)

6. Build Mental Frameworks

I'm trying to master [skill/topic]. Build me a custom mental model or decision framework that simplifies how to approach, evaluate, and improve in it over time like a pro would.

7. Upgrade Your Brain in 30 Days

Design a 30-day brain upgrade program that includes high-IQ thinking routines, mind-expanding prompts, advanced reading material, memory-enhancing techniques, and strategic rest habits. Keep it practical and time-efficient.

8. Simulate a Board of Advisors

Act as my personal board of advisors for [decision or challenge]. Give me perspectives from: a skeptical CFO, an optimistic entrepreneur, a risk-averse lawyer, and a visionary strategist. Then synthesize their views into actionable advice.

9. Debug Your Life Systems

I want to optimize my [morning routine / work habits / health / relationships]. Act as a systems engineer. Audit my current approach, identify bottlenecks and failure points, and redesign it for maximum efficiency and sustainability.

10. Future-Proof Your Career

I work as a [role] in [industry]. Analyze how AI and automation will impact my field over the next 5 years. Identify skills that will become obsolete, skills that will become more valuable, and give me a concrete plan to stay ahead of the curve.

10 SMART MINI-PROMPTS FOR PERSONAL GROWTH (1-5)

1. Understand Anything Like a Genius

I want to understand [topic] as if I were a genius. Break down the concept using advanced analogies, real-world applications, counterexamples, and multiple perspectives, then test my understanding with expert-level questions.

2. Master Any Skill for FREE

Assume you're a master of [skill] with 20+ years of experience. Reverse engineer the process that got you there, and build me a day-by-day plan to reach that level as fast as humanly possible using only free or low-cost resources.

3. Fix Mental Blocks

I've been struggling with [issue: procrastination, burnout, fear]. Analyze it like a cognitive scientist. Identify the root causes, the behavioral patterns behind it, and design a habit loop to eliminate it.

4. Turn Confusion into Clarity

I don't understand [concept]. Break it down step-by-step using metaphors, visual imagery, and real-world examples. Then create a mental shortcut or framework I can use to remember it forever.

5. Get a PhD-Level Breakdown

Teach me [topic] like I'm preparing for a PhD. Start from first principles, explain all foundational theories, include historical evolution, and give me key papers/books to study further.
